1. Department Overview — B.E. EEE Programme Details, Vision and Mission

Chunk ID: msajce_eee_chunk_01 | URL: https://www.msajce-edu.in/eee.php#tab1 | ~430 tokens

■ This chunk covers the EEE department overview, programme details (duration, seats, eligibility, curriculum links), and the department vision and mission statements.

Department of Electrical and Electronics Engineering — MSAJCE:

Electrical engineering is concerned with the study, design, installation and operation of equipment and machines ranging from small motors to heavy generators and turbines. Electrical engineering jobs represent over 25% of all available engineering jobs. In India, 30% of government jobs are from the electrical engineering sector. Electrical and electronics engineers can enter job markets of CSE, ECE, ICE, Robotics, Mechanical Engineering, and Healthcare sectors. Engineers from other branches cannot enter electrical engineering job markets. Conventional EEE jobs include power generation, transmission, distribution, manufacturing and utilization. With the expected boom in the electric vehicle sector, the demand and contribution of electrical engineers to Indian economy will be tremendous. The Government of India has set targets for renewable energy (solar, wind) to reduce carbon footprint and boost economy.

B.E. — Electrical and Electronics Engineering:

Duration: 4 years (Regular) / 3 years (Lateral Entry)

No. of Semesters: 8 (Regular) / 6 (Lateral Entry)

Intake / No. of Seats: Total — 30 (Government — 15, Management — 15)

Eligibility: 10+2 system of Education. Must have secured a pass in Physics, Chemistry and Mathematics in the qualifying examination.

Curriculum & Syllabus:

2021 Regulation: https://www.msajce-edu.in/uploads/academics/2021Regulation.pdf

2017 Regulation: https://www.msajce-edu.in/uploads/academics/2017Regulation.pdf

Career Opportunities: Circuit Designers, Energy Efficiency Engineer, Distribution Planning Engineer, Power System Engineer, Research Engineer, Electrical Safety Engineer, Power Plant Engineer

Scope for Higher Studies: M.E. / M.Tech. / M.B.A.

Department Vision:

To be a centre of excellence for transforming students into proficient Electrical and Electronics Engineers through sustainable practices.

Department Mission:

M1. Impart core fundamental knowledge and necessary skills in Electrical and Electronics Engineering through innovative teaching and learning methodology.

M2. Inculcate critical thinking, ethics, lifelong learning and creativity needed for industry and society.

M3. Cultivate the students with all-round competencies, for career, higher education and self-employability.

B.E. EEE Programme — Key Details

Parameter	Details
Programme	B.E. — Electrical and Electronics Engineering
Duration	4 years (Regular) / 3 years (Lateral Entry)
Semesters	8 (Regular) / 6 (Lateral Entry)
Total Intake	30

Parameter	Details
Government Quota	15
Management Quota	15
Eligibility	10+2 with pass in Physics, Chemistry and Mathematics

2. OBE — PEOs, PSOs and Programme Outcomes (PO1–PO12)

Chunk ID: msajce_eee_chunk_02 | URL: https://www.msajce-edu.in/eee.php#tab2 | ~490 tokens

■ This chunk covers all Outcome Based Education details for the EEE department — Programme Educational Objectives (PEOs), Programme Specific Outcomes (PSOs), and all 12 Programme Outcomes (POs).

Programme Educational Objectives (PEOs) — EEE Department, MSAJCE:

PEO1. Graduates will be prepared for designing Electrical and Electronics components and systems with creativity and sustainability.

PEO2. Graduates will be skilled in the use of modern tools for critical problem solving and analyzing industrial and societal requirements.

PEO3. Graduates will be prepared with managerial and leadership skills for career and starting up own firms.

Programme Specific Outcomes (PSOs):

PSO1. Apply the acquired knowledge in conventional and non-conventional energy systems to provide acceptable solutions for industrial, societal and entrepreneurial needs.

PSO2. Evaluate, analyze and design components and systems for electric vehicles and hybrid vehicles that are sustainable and eco-friendly.

Programme Outcomes (POs):

PO1. Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2. Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3. Design/Development Of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.

PO4. Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5. Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6. The Engineer and Society: Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7. Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9. Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multi-disciplinary settings.

PO10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11. Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multi-disciplinary environments.

PO12. Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PEOs — Programme Educational Objectives

PEO	Statement
PEO1	Graduates will be prepared for designing Electrical and Electronics components and systems with creativity and sustainability.
PEO2	Graduates will be skilled in the use of modern tools for critical problem solving and analyzing industrial and societal requirements.
PEO3	Graduates will be prepared with managerial and leadership skills for career and starting up own firms.

PSOs — Programme Specific Outcomes

PSO	Statement
PSO1	Apply the acquired knowledge in conventional and non-conventional energy systems to provide acceptable solutions for industrial, societal and entrepreneurial needs.
PSO2	Evaluate, analyze and design components and systems for electric vehicles and hybrid vehicles that are sustainable and eco-friendly.

3. Job Profiles — Employment Forecast 2025–2030, Sector-Wise Growth Projections

Chunk ID: msajce_eee_chunk_03 | URL: https://www.msajce-edu.in/eee.php#tab3 | ~460 tokens

■ This chunk covers the EEE job market overview, key growth drivers (EVs, renewable energy, semiconductors, 5G), sector-wise employment growth projections for 2025-2030, and education-level forecast for B.E./B.Tech graduates.

EEE Job Profiles — India and Abroad (Public and Private Sectors):

Electrical motors and Generators, Manufacturing, Consultancy (Electrical Engineering), Electrical appliances, Electrical components companies, Lighting and luminaries, Power Generation, Electric wires and Cables, Electrical exporters, Measurements and Instrumentation, Power Distribution, Transformers, Manufacturing Industries, Green Energy Companies in India.

Employment Forecast: Electrical and Electronics Engineering — 2025–2030 in India (Based on current trends, government policy, industry shifts, and emerging technologies):

Key Growth Drivers:

1. Energy Transition and Renewable Energy: Major national investment in solar, wind, and hybrid energy (target: 500 GW by 2030). Rise in demand for Power systems engineers, Grid integrators, and Solar plant Designers.

2. Electric Vehicles (EVs): India's EV market projected to grow at 40% CAGR. Strong demand for Power electronics, Battery management systems (BMS), Motor control, and Embedded system engineers.

3. Smart Grids and Energy Automation: Deployment of Smart meters, IoT in transmission, and load balancing algorithms. Need for EEE engineers with knowledge in IoT, Data analytics, and AI integration.

4. Semiconductor and Electronics Manufacturing (PLI Scheme): Boost from government's Production-Linked Incentive (PLI) scheme for electronics and chip manufacturing. Rise in job demand in PCB design, VLSI, microelectronics, and hardware design.

5. Digital India and 5G Rollout: Massive growth in Telecom infrastructure, Optical fiber networks, and IoT ecosystems. High demand for RF engineers, signal processing, and embedded firmware developers.

Sector-Wise Employment Growth Projections (2025–2030):

Sector | Projected Job Growth | Key Roles In Demand

Renewable Energy | 10–12% per year | Grid engineer, inverter designer, SCADA

Electric Vehicles and Mobility | 15–18% per year | BMS, Motor control, Embedded systems

Power Transmission and Utilities | 5–7% per year | Substation, load dispatch, Protection systems

Semiconductor and Electronics | 12–15% per year | VLSI, PCB design, ASIC/FPGA engineers

Automation / Industry 4.0 | 8–10% per year | PLC/SCADA, Robotics integration, IIoT

Telecom and 5G | 10–12% per year | RF, Embedded C, DSP, IoT firmware

Forecast by Education Level:

Education Level | Opportunities | Job Growth Rate | Recommendations

B.Tech/B.E. | Design, systems, product development | 7–9% | Focus on IoT, Power electronics, MATLAB, Embedded Systems, AI and IoT

Sector-Wise Employment Growth Projections 2025–2030

Sector	Projected Job Growth	Key Roles In Demand
Renewable Energy	10–12% per year	Grid engineer, inverter designer, SCADA
Electric Vehicles and Mobility	15–18% per year	BMS, Motor control, Embedded systems

Sector	Projected Job Growth	Key Roles In Demand
Power Transmission and Utilities	5–7% per year	Substation, load dispatch, Protection systems
Semiconductor and Electronics	12–15% per year	VLSI, PCB design, ASIC/FPGA engineers
Automation / Industry 4.0	8–10% per year	PLC/SCADA, Robotics integration, IIoT
Telecom and 5G	10–12% per year	RF, Embedded C, DSP, IoT firmware

EEE Employment Forecast by Education Level

Education Level	Opportunities	Job Growth Rate	Recommendations
B.Tech/ B.E.	Design, systems, product development	7–9%	Focus on IoT, Power electronics, MATLAB, Embedded Systems, AI and IoT

Sample questions this chunk answers:

• What are the job opportunities for EEE graduates?

• What is the employment forecast for EEE in India?

• What is the growth rate in the electric vehicle sector for EEE engineers?

• What is the job growth in renewable energy for EEE graduates?

• What skills should EEE students focus on?

• What is the PLI scheme impact on EEE jobs?

• What is the job growth rate for EEE in semiconductor sector?

• What roles are in demand in Automation and Industry 4.0 for EEE?

Keywords: EEE job opportunities, employment forecast 2025 2030, electric vehicle 40% CAGR, renewable energy 500 GW, BMS battery management, PLI scheme semiconductor, VLSI PCB design, SCADA PLC automation, IoT embedded systems, 5G telecom, power electronics job, grid engineer, solar plant designer, RF engineer, DSP firmware, Industry 4.0 IIoT

[Overlap → next chunk]: EEE Programme Outcomes cover 12 POs (PO1 Engineering Knowledge through PO12 Life-long Learning). PSO1 covers conventional and non-conventional energy systems. PSO2 covers electric vehicles and hybrid vehicles that are sustainable and eco-friendly.

Question Bank: https://www.msajce-edu.in/academics/eee/2021/QuestionBank/CS3353-QB.pdf

Semester IV:

1. GE3451 — Environmental Sciences and Sustainability

2. EE3401 — Transmission and Distribution

3. EE3402 — Linear Integrated Circuits

4. EE3403 — Measurements and Instrumentation

5. EE3404 — Microprocessor and Microcontroller
6. EE3405 — Electrical Machines II

(All have Lesson Plan, Question Bank, Lecture Notes and ICT Tools at https://www.msajce-edu.in/academics/eee/2021/)

Semester V:

1. EE3501 — Power System Analysis
2. EE3591 — Power Electronics
3. EE3503 — Control Systems
4. EE3001 — Utilization and Conservation of Electrical Energy
5. EE3006 — Power Quality
6. EE3012 — Electrical Drives
7. MX3084 — Disaster Management

Student Projects — EEE Department:

1. Electric 3-Wheeler: Students developed a working electric three-wheeled vehicle as a departmental project. This demonstrates the application of power electronics, motor control and battery systems.

2. Electric Cycle: Students built a functional electric cycle, applying knowledge of electric drives, embedded systems and motor control.

3. Solar Iron Cart: Students developed a solar-powered iron cart, demonstrating application of renewable energy, solar panels and power management systems.

Student Activities:

Co-Curricular Activities: Internship Details, Industrial Visits, Professional Society Activities.

Extra Curricular Activities: Various events and competitions.

Members of Alumni Association: Alumni network maintained by the EEE department.
