Overview of the Information Technology department at MSAJCE and full details of the B.Tech IT programme including duration, seats, eligibility, and curriculum links.

Department of Information Technology — MSAJCE

The role of Information Technology is vital in every aspect of human life. The information technology is the study and use of systems for storing, retrieving and processing information. With the introduction of computers, the business world has changed forever; using computers ensure smooth running of the business. Information technology helps the business world to view changes in the global markets faster than they usually do. Due to the development of this technology, globalization has increased and the world is brought closer. Information is stored and shared quickly and easily across the globe. Communication has become easier and cheaper. Using internet, Skype, people can speak to each other all over the globe. Social media and mobile devices make the people closer to each other. The key fields include Machine Learning, Deep Learning, Data Science, Artificial Intelligence, Cloud Computing, Networking, Mobile computing, Block Chain and so on, which have tremendous job openings.

Programme: B.Tech. — Information Technology

Duration: 4 years (Regular) / 3 years (Lateral Entry)

No. of Semesters: 8 (Regular) / 6 (Lateral Entry)

Intake / No. of Seats: Total — 60 (Government — 30, Management — 30)

Eligibility: 10+2 system of Education. Must have secured a pass in Physics, Chemistry and Mathematics in the qualifying examination.

Curriculum & Syllabus Links:

- 2021 Regulation: <https://www.msajce-edu.in/uploads/academics/2021Regulation.pdf>

- 2017 Regulation: <https://www.msajce-edu.in/uploads/academics/2017Regulation.pdf>

Career Opportunities: Planners, Designers, Constructors & Operators | Stewards of the Environment | Innovators & Integrators of Technology | Managers of Risk | Leaders in Public Policy | Public Sector Undertaking | Government Sector

Scope for Higher Studies: M.E. / M.Tech. / M.B.A.

B.Tech IT Programme Summary

Parameter	Details
Programme	B.Tech. — Information Technology
Duration	4 years (Regular) / 3 years (Lateral Entry)
No. of Semesters	8 (Regular) / 6 (Lateral Entry)
Total Seats	60
Government Quota	30
Management Quota	30
Eligibility	10+2 with Physics, Chemistry and Mathematics
Higher Studies	M.E. / M.Tech. / M.B.A.

2. Vision, Mission, PEOs and PSOs

Chunk ID: msajce_it_chunk_02 | URL: <https://www.msajce-edu.in/it.php#tab2> | ~430 tokens

The IT department's vision, mission statements, Programme Educational Objectives and Programme Specific Outcomes for the B.Tech IT programme.

Vision: To be a centre of excellence for transforming students into proficient IT professionals through sustainable practices.

Mission:

M1. Impart core fundamental knowledge and necessary skills in Information Technology through innovative teaching and learning methodology

M2. Inculcate critical thinking, ethics, lifelong learning and creativity needed for industry and society

M3. Cultivate the students with all-round competencies, for career, higher education and self-employability

Programme Educational Objectives (PEOs):

PEO1 | PEO Description

PEO1 | Graduates will be prepared for designing and developing efficient Information Technology systems and software with creativity and sustainability

PEO2 | Graduates will be skilled in the use of modern tools for critical problem solving and analyzing industrial and societal requirements

PEO3 | Graduates will be prepared with managerial and leadership skills for career and starting up own firms

Program Specific Outcomes (PSOs):

Engineering Graduates will be able to:

PSO1 | Apply the acquired knowledge and adapt modern tools to provide the innovative solutions in Networking and Cyber Security applications

PSO2 | Design, implement and test mobile apps and software solutions for various automation applications

Programme Educational Objectives

PEO	Description
PEO1	Graduates will be prepared for designing and developing efficient Information Technology systems and software with creativity and sustainability
PEO2	Graduates will be skilled in the use of modern tools for critical problem solving and analyzing industrial and societal requirements
PEO3	Graduates will be prepared with managerial and leadership skills for career and starting up own firms

Programme Specific Outcomes

PSO	Description
PSO1	Apply the acquired knowledge and adapt modern tools to provide innovative solutions in Networking and Cyber Security applications

3. Programme Outcomes (POs)

Chunk ID: msajce_it_chunk_03 | URL: <https://www.msajce-edu.in/it.php#tab2> | ~460 tokens

The 12 Programme Outcomes (POs) for the B.Tech IT programme at MSAJCE defining graduate competencies.

Programme Outcomes (PO) — B.Tech Information Technology, MSAJCE

PO1 — Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2 — Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3 — Design/Development Of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4 — Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5 — Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6 — The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7 — Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8 — Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9 — Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multi disciplinary settings.

PO10 — Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large.

PO11 — Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work.

PO12 — Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Programme Outcomes

PO	Title	Description
PO1	Engineering Knowledge	Apply mathematics, science, engineering fundamentals to complex problems
PO2	Problem Analysis	Identify, formulate, and analyze complex engineering problems
PO3	Design/Development	Design solutions for complex engineering problems
PO4	Investigations	Use research-based knowledge and methods for valid conclusions
PO5	Modern Tool Usage	Create and apply modern engineering and IT tools
PO6	Engineer and Society	Assess societal, health, safety, legal, cultural issues
PO7	Environment and Sustainability	Understand impact of engineering solutions on environment
PO8	Ethics	Apply ethical principles and commit to professional ethics
PO9	Team Work	Function as individual and team member/leader
PO10	Communication	Communicate effectively on complex engineering activities
PO11	Project Management	Apply engineering and management principles
PO12	Life-long Learning	Engage in independent and life-long learning

4. Job Profiles and IT Employment Forecast 2025–2030

Chunk ID: msajce_it_chunk_04 | URL: <https://www.msajce-edu.in/it.php#tab3> | ~500 tokens

IT job opportunities in India and abroad, employment forecast for 2025-2030, and key drivers of IT industry growth.

Job Profiles — IT Department, MSAJCE

Job opportunities are available in various MNCs in service and product companies as System Engineers, Software Professionals, Network Engineers, System Analysts, System Administrators, Project Leaders, Education sector, System Architects and Academicians.

IT Employment Forecast in India — 2025 to 2030:

The Information Technology (IT) industry in India is poised for strong growth over the next five years, driven by domestic and global trends.

Key Drivers of IT Growth:

1. Digital Transformation: Businesses across all sectors are adopting Cloud computing, AI, Big Data, IoT, and Blockchain. Demand for cloud engineers, data scientists, AI specialists, and DevOps engineers will rise.
2. Cloud Computing: Cloud market in India is growing rapidly. AWS, Microsoft Azure, and Google Cloud will create high demand for cloud architects, cloud administrators, and cloud security specialists. Hybrid cloud solutions will generate opportunities in cloud migration, cloud operations, and cloud infrastructure management.
3. Artificial Intelligence and Machine Learning: AI is transforming healthcare, finance, manufacturing, and retail. By 2030, demand will rise for data scientists, AI researchers, machine learning engineers, and AI-enabled software developers. Skills needed: AI ethics, deep learning, AI model deployment.
4. Cyber Security: With increasing cyberattacks and regulations (GDPR, Personal Data Protection Bill), demand for cybersecurity experts will grow. Roles: ethical hackers, incident response professionals, security architects, SOC analysts.
5. Fintech and Blockchain: India's cashless economy push requires blockchain developers, smart contract auditors, and DeFi specialists.
6. 5G and Telecommunications: Rollout of 5G will create demand for 5G network engineers, telecommunications architects, and telecom software developers. IoT will see a boom in smart cities, agriculture, and healthcare.
7. E-Governance and Smart Cities: Government initiatives like Digital India, Smart Cities Mission, and Make in India will create roles for IT project managers, data engineers, IoT developers, and cloud solutions architects.
8. Outsourcing and Off-shoring: India will continue as a global IT outsourcing hub with demand for application developers, IT consultants, systems integrators, and support specialists.

5. IT Domain Employment Opportunities and Salary Expectations

Chunk ID: msajce_it_chunk_05 | URL: <https://www.msajce-edu.in/it.php#tab3> | ~560 tokens

Detailed breakdown of IT domain-wise employment opportunities with job roles, skills, certifications, and salary expectations in India for 2025-2030.

Employment Opportunities in IT Domain (2025–2030):

1. Cloud Computing and Virtualization:

Job Roles: Cloud Engineer, Cloud Solutions Architect, Cloud Security Specialist, DevOps Engineer, Cloud Administrator

Skills: AWS, Azure, Google Cloud, Cloud security (IAM, encryption), Containers (Docker, Kubernetes), Infrastructure as Code (Terraform, Ansible)

Certifications: AWS Certified Solutions Architect, Microsoft Certified Azure Solutions Architect Expert, Google Cloud Professional Cloud Architect, Certified Kubernetes Administrator (CKA)

2. Artificial Intelligence and Machine Learning:

Job Roles: Data Scientist, AI Engineer, Machine Learning Engineer, NLP Specialist, Deep Learning Engineer

Skills: Python, R, Java; ML frameworks (TensorFlow, Keras, PyTorch); Data visualization (Matplotlib, Seaborn); AI/ML algorithms and statistical models

Certifications: Microsoft Certified Azure AI Engineer Associate, Google Professional Machine Learning Engineer, IBM AI Engineering Professional Certificate, AWS Certified Machine Learning – Specialty

3. Cyber Security:

Job Roles: Security Analyst, Ethical Hacker (Penetration Tester), Security Architect, SOC Analyst, Cybersecurity Consultant

Skills: Risk management, Ethical hacking tools (Metasploit, Burp Suite), Firewalls, SIEM tools (Splunk, LogRhythm), Incident response and forensics

Certifications: CEH, CISSP, CISM, CompTIA Security+, CISA

4. Blockchain and Fintech:

Job Roles: Blockchain Developer, Smart Contract Developer, Blockchain Architect, Cryptocurrency Expert, Blockchain Security Engineer

Skills: Blockchain platforms (Ethereum, Hyperledger, Solana), Smart contract development (Solidity, Rust), DApp development

Certifications: Certified Blockchain Developer, Ethereum Developer Certification, Certified Blockchain Professional (CBCP)

5. IT Infrastructure and Networking:

Job Roles: Network Administrator, IT Systems Engineer, IT Infrastructure Manager, Virtualization Engineer, Network Security Engineer

Skills: TCP/IP, DNS, HTTP, VMware, Hyper-V, VPN, IDS/IPS, firewalls

Certifications: CCNA, CompTIA Network+, CISA, VMware Certified Professional (VCP)

Expected Employment Growth Trends:

- Annual Growth Rate: Indian IT industry expected to grow at 7-10% per annum, especially in Cloud computing, Cyber security, AI, and data science.

- Job Shift: Towards specialized IT roles — Cloud engineers, AI specialists, Cyber security experts, Data analysts.

- Salary Growth: Cyber security, AI, data science, and Blockchain expected to see highest growth with 20-30% higher salaries compared to other IT positions.

Salary Expectations in IT (India) — 2025 to 2030:

- Cloud Architects: Rs. 12 – Rs. 24 lakhs per annum

- AI/ML Engineers: Rs. 8 – Rs. 20 lakhs per annum

- Cybersecurity Experts: Rs. 7 – Rs. 15 lakhs per annum

- Blockchain Developers: Rs. 10 – Rs. 25 lakhs per annum

- Data Engineers: Rs. 8 – Rs. 18 lakhs per annum

- IoT Engineers: Rs. 7 – Rs. 14 lakhs per annum

- IT Project Managers: Rs. 15 – Rs. 25 lakhs per annum (depending on experience)

Salary Expectations in IT India 2025-2030

Role	Salary Range (per annum)
Cloud Architects	Rs. 12 – Rs. 24 lakhs
AI/ML Engineers	Rs. 8 – Rs. 20 lakhs
Cybersecurity Experts	Rs. 7 – Rs. 15 lakhs
Blockchain Developers	Rs. 10 – Rs. 25 lakhs
Data Engineers	Rs. 8 – Rs. 18 lakhs
IoT Engineers	Rs. 7 – Rs. 14 lakhs
IT Project Managers	Rs. 15 – Rs. 25 lakhs
